PROFESSIONAL EXPERIENCE

VALID SOLUÇÕES BANKING & MEIOS DE PAGAMENTOS - São Paulo/Bogotá (July 2023 - February 2025)

Position: **Development Technical Leader**

Responsibilities:

- Led development teams for mobile and web financial projects using Agile methodologies such as SCRUM.
- Supervised the development of Davivienda's mobile SuperApp, optimizing user experience and reducing load times by 30%.
- Designed microservices architectures for banking platforms and digital wallets like Daviplata and Colsubsidio Wallet.
- Implemented integrations with internal and external systems, ensuring efficient communication between services.
- Reinforced development best practices, automated testing, and secure deployments through CI/CD pipelines.
- Optimized software, reducing production defects by 40% through version control and automation.
- Aligned functionalities with client objectives and ensured timely deliveries.

Tools and Technologies:

AWS (EC2, S3, RDS, Lambda), React Native, Java Spring Boot, Docker, Kubernetes, Jenkins, Bitbucket Pipelines, PostgreSQL, Git, REST APIs, Swagger, Jira.

INTERRAPIDÍSIMO S.A. Bogotá (July 2022 - July 2023)

Position: Development Technical Leader

Responsibilities:

- Led SCRUM teams for strategic projects such as "Pago en Casa" and Business Intelligence integrations.
- Developed backend services in Java with REST APIs and SOA architecture, ensuring scalability.
- Implemented ETL processes and AWS Lambda for data automation.
- Integrated internal and external services, reducing errors by 35%.
- Supervised code quality with unit tests and secure development standards.
- Coordinated agile CI/CD deployments in cloud environments.

Tools and Technologies:

Java, Python, Angular, SQL Server, Oracle, PostgreSQL, Azure DevOps, Azure Cloud, AWS Lambda, ETL, REST APIs, SCRUM, Git, Jira.

EXCELCREDIT FINTECH - Bogotá (October 2020 - May 2022)

Positions: Developer Technical Lead | Senior Developer III | Operations Lead

Responsibilities:

- Directed technical and operations teams for the ABACUS system, ensuring stability and evolution, reducing critical incidents by 40% through microservices migration.
- Enhanced operational and accounting modules.
- Modernized the financial core with DIGICRÉDITO and performed secure REST API integrations.
- Coordinated efficient deployments and automated testing in collaboration with QA and infrastructure teams.

Tools and Technologies:

Java (Spring Data, Spring JDBC), Microservices, Docker, Kubernetes, Maven, PrimeFaces (JSF), Angular, PostgreSQL, AWS, Bitbucket, Git, Jenkins, Rancher, Jira.

TECHNICAL SKILLS

Technologies:

Visual Studio Code, IntelliJ IDEA, Postman, Swagger, Docker, Kubernetes, Jenkins, Bitbucket Pipelines, Azure DevOps, Jira, Git, Angular.

Languages:

Java (Spring Boot, Spring Data, Spring JDBC), Python, JavaScript, TypeScript, Angular, SQL, PL/SQL, Bash.

Services:

AWS (EC2, S3, RDS, Lambda), Microsoft Azure Cloud, Azure DevOps, Linux, REST APIs, SOA (Service-Oriented Architecture), ETL.

Databases:

Oracle, PostgreSQL, MySQL.

Methodologies:

Agile/Scrum, Kanban, SOLID principles, Microservices Architecture, Continuous Integration/Continuous Delivery (CI/CD), Code Review, Version Control (Git).
